Fall is the best time to sow lawn seed

Cool Weather, Plenty of Moisture, Less Weeds Make Fall Seeding Best.

SCOTTS LAWN CARE PRODUCTS

Scotts Lawn Seed

This is a top-quality blend of grasses for open, sunny or lightly shaded lawns. If you are building a new lawn, sow Scotts Seed at the rate of 4 to 6 lbs. per 1000 sq. ft. If you already have a lawn but want to improve it, sow 2 or 3 lbs. per 1000 sq. ft., depending on the present stand of grass. To sow 2 lbs. Scotts Lawn Seed per 1000 sq. ft., the proper scale setting on your Scott Spreader is No. 6. To sow 4 lbs. per 1000 sq. ft., the proper scale setting is No. 8.

Grass Mixtures for Sunny Places

Turf-Maker

Highest quality lawn seed available anywhere. Blended to produce fine permanent lawns. Contains Certified Colonial Bent, Creeping Red Fescue, heavyweight Kentucky Blue Grass and Fancy Red Top. 1 lb. \$1.95; 3 lbs. \$5.75; 5 lbs. \$9.50; 25 lbs. \$46.65; 50 lbs. \$91.80.

McARDLE'S SPECIAL

Our own special mixture particularly adapted to soil conditions in this locality. Possesses exceptional staying qualities and produces a rich green lawn. 1 lb. \$1.50; 5 lbs. \$7.20; 25 lbs. \$35.20; 100 lbs. \$138.00.

Sunilawn. Although Sunilawn has a rougher texture than the higher-priced mixtures, we consider it very practical. It grows well under rough soil conditions and contains white clover, which we highly recommend. 1 lb. \$1.00; 5 lbs. \$4.75; 25 lbs. \$23.00; 100 lbs. \$90.00.

Green-Up. This is a quick-growing, economical mixture of grasses. Since the grasses in this mixture are not 100% permanent, Green-Up is often used for a temporary stand of grass. We do not recommend it for permanent lawn areas, although it is often used for such. Again we say that the high-priced grass seed mixtures are the least expensive when you consider the high cost of reseeding and renovating. 1 lb. 65 cts.; 5 lbs. \$2.75; 25 lbs. \$13.00; 50 lbs. \$24.45.

Grass Mixtures for Shady Places

Turf-Maker FOR SHADE

The perfect companion for Turf-Maker. Blended of the finest shade-tolerant grasses. Contains Creeping Red Fescue, Poa trivialis, Chewing's Fescue and Fancy Red Top. 1 lb. \$1.95; 3 lbs. \$5.75; 5 lbs. \$9.50; 25 lbs. \$46.65; 50 lbs. \$91.80.

McARDLE'S SHADY

Another one of our special mixtures particularly adapted to shady areas in this vicinity. Contains Fescue, Kentucky Blue Grass and Rye Grass. 1 lb. \$1.50; 5 lbs. \$7.20; 25 lbs. \$35.20; 100 lbs. \$138.00.

Town of Greenwich Grass Seed Mixture

For Sun or Shade

ESPECIALLY ADAPTED TO THIS LOCALITY

This is the same formula that is used in the beautiful parks of the Town of Greenwich. Because of its high fescue content, it is adapted to shade and sun. Its velvety green color is outstandingly good, and its texture is very fine. The Illahee Creeping Red Fescue in this mixture helps fight crabgrass. This formula was first offered by us in limited quantity in 1952. Since then, time has proved it to be most satisfactory and very permanent. The repeat business on this new mixture also indicates to us that those who have tried it are most satisfied with the results. 1 lb. \$1.50; 5 lbs. \$7.25; 25 lbs. \$35.00; 100 lbs. \$138.00.

NEW! Merion Blue Grass Formula

This new grass formula contains by weight 40% Merion Blue Grass, 40% Illahee Creeping Red Fescue, 10% Highland Bent, and 10% Fancy Red Top. Merion Blue Grass was developed under the leadership of the U. S. Golf Association Green Section and has been tested for several years, receiving the highest ratings at turf trials. Its big advantage is that it is resistant to fungous diseases and stays green during the hot summer months. Because the seed is so small, one pound of this formula will sow 500 to 750 sq. ft. 1 lb. \$2.40; 5 lbs. \$11.75; 25 lbs. \$56.00. (Supply limited.)

Straight Merion Blue. 1 lb. \$3.95; 5 lbs. \$19.50; 10 lbs. \$38.50. (Supply limited.)

To Grow Tulips Indoors

A 6-inch bulb pan will hold 6 bulbs, while a 7-inch bulb pan will hold about 7 bulbs, etc. A good soil mixture to use consists of 1 part garden soil, 1 part Michigan Peat and 1 part sand. Place bulbs in bulb pans about 1 inch apart, cover with an inch of soil and water thoroughly. Put bulb pans in a coldframe or bury them in the garden below the frost line for 8 to 10 weeks. This forces root development. Bring bulb pans indoors, first in a cool room and gradually to the average room temperature. Daffodils and Hyacinths are treated likewise.
